About This Game

Play as the zombies!

Infect and Destroy is an indie game in which you play as an infectious disease with the sole purpose of eliminating everyone on Earth. Play as an ultra-intelligent self-aware virus capable of reanimating the dead and turning them into your minions. Spread amongst the globe, infecting and reanimating all those who stand in your way.

Features

- **Play as the disease** - Experience an interactive and non-linear sandbox campaign in which you take control of a zombie plague the likes of which never seen before by mankind. Major cities and locations from around the globe are ready for your terror and carnage.
- **You are the horror** - Evolve and mutate your virus, spawn special types of zombies, invoke city-wide disasters and send the humans fleeing for their miserable doomed lives. You are the one who decides when it is time to scream and when it is time to die.
- **Expand your reign of fear** - The entire world is your breeding ground. Infect abandoned buildings to turn them into hives, setting up your base of gruesomeness as you go along. Traps, spawners and terrifying organic structures are all at your disposal.

-
- **Adapt to survive** - The humans will do all in their power to stop your tyrannical plague. Quarantines, military strikes, evacuations, vaccinations, nukes and more will all be used with hopes of stopping their inevitable extinction.
 - **Huge game worlds** - All confrontations and infections take place in realistically sized scenarios. Your hordes will have to cross swamps, forests, mountains and more to cure their insatiable hunger.
 - **Affect the world around you** - Take out power stations to cause blackouts, infect water distribution supplies, ruin food stockpiles, cause riots and more, thus causing the human race to crumble from within.
 - **Co-Op and Versus Modes** - Players can aid each other by playing as the Conniption virus, or else test their mettle against one another in epic humans versus zombies confrontations.
 - **Pop-In Pop-Out** - The player can take control of individual zombies and infected for a truly immersive and personalized experience. Use stealth to take special infected behind enemy lines or charge and pummel through military front lines.

As a long time fan of Leisure Suit Larry games I found this one to be very enjoyable. the story could have ben longer, but the game was fun none the less.

Hope to see more Leisure Suit Larry games from CrazyBunch as they have the right idea about Leisure Suit Larry. I do hope any future games have a longer story.. Very enjoying to play, makes you think and use your head a bit but i had to stop playing as my game crashed every 3 mins due to not enough space error or i had to completely resart a mission due to an error while loading a file. Very dissappointed i cant play the other 12 mission :(. \u2665\u2665\u2665\u2665in brilliant . Nobody told me we were racing black screens. But hey, profit from trading cards? Yes please.. Great concept, amazing execution.

ZeGame is everything you'd want from a minimalistic puzzle game. Strong design, intuitive controls, smooth gameplay, surreal soundtrack, you name it. The puzzle difficulty is *just right*, so that you can play for hours on end without getting bored.

I absolutely love the smoothness of the game's controls, and how easy it is to move around (once you get the hang of it). The backgrounds and audio are very relaxing, inviting you to move at your own pace. The design of the blocks is another plus, carrying just enough detail to look unique, yet not enough to ruin the minimalistic style.

If you like simple, intuitive, or innovative games, I'd strongly recomming trying out ZeGame.. Wow - this game made specially for me!

Relaxing beat'em up with some portion of dialogues and puzzles. Very nice humor, which projecting on gameplay. Passed the game with my young son without cheats and have no problem with it)

Strongly reccomended!

Ah... and of course very beautiful graphics with special pixel visualization techniques looks very cool! I was waiting pixel games with those technology so long!. Pros:

- I guess it's really easy to get the handful of achievements (to get a "perfect game" on your profile), but only if you want to drag yourself through all the levels
- Steam Cloud support

Cons:

- Terrible engine
- No story or plot
- Robots OHK you
- No tutorial or guide anywhere
- Only 7 levels (with two extra ones greyed out and marked as "work in progress")
- VSync only works on 60 Hz? Lol
- Languages available: English, IIIIII, and IIIIIIII
- Awful controls
- Conflicting keybinds that you can't change; dying because you tried to shoot a robot while near a crate
- Your character turns much slower than you can move your cursor, meaning you have to wait so long to finish turning 180 to kill a robot chasing you
- Robots hang outside your bunker and spawnkill you
- Bad graphics
- UI looks like it was made in MS Paint
- Ridiculously hard even on the lowest difficulty; I can't even complete the first level
- Four single-use items: stone (don't even know what this does, I couldn't figure out how to use it), invisible (sometimes works, sometimes doesn't), hologram (again, only sometimes works), laser gun (kills one of the dozens of robots in your path, and then you're screwed because they all heard the gunshot). Great simple game, very sensorial. You get to upload your own tunes and see them in the vizualizer. Recommendations: include clearer instructions but other than that, perfect game to relax and listen to music.. I am having trouble with the "swipe" directional control during the freaking tutorial!!!! IT DOESN'T WORK - AT ALL. also, there is no menu for brightness, etc. "I don't even care about that.... the game is broken and left for dead.

Can somebody help me out with?? It's driving me nutso.

There is potential here, I want you to keep that in mind, because down the road this game could be interesting. There's a couple of interesting mechanics with the explorer units and exploiting resources, and the diplomacy portion could be interesting in terms of holding off people attacking you. This definitely can change based on what options become available, and I will keep my eye out on this one.

But the game is FAR too slow. Missing keyboard shortcuts is brutal, as everything is mouse driven. A hundred turns in, no one has attacked each other: no one can. The first 50 turns is slow going yet essential. There's missing information to know exactly what you're building. Missing UI elements to know what your status is. You feel disconnected from the experience. Lack of additional sounds loses immersion.

For more gameplay and Impressions/Details, look at the video here: <http://youtu.be/fhxTq1VSwis>. [Pretty fun game. I played through the Tutorial, Campaign and lots of Survival mode. I have played a few rounds of multiplayer as well. Overall it is pretty fun to play--though might be most fun to play with friends.](#)

[The multiplayer and survival modes both offer leaderboards to compete with friends / everyone.](#)

[I look forward to the community for this game to grow and see where this game goes.. I love interactive stories. I love pirates.](#)

[This game. was an amazing experience.](#)

[I played it for a good amount of time. and I absolutely love it.](#)

[Note: This is my first time I've played a game from Choice of Games](#)

[In any case, I love this. It's cheaper than regular books irl. <3. This was an epic game Gumboy Tournament is a semi-follow up to 2006's 2D side-scroller Gumboy: Crazy Adventures. What's unique about Gumboy Tournament is that it's not a linear, move-from-the-left-of-the-screen-to-the-right-of-the-screen platformer in the vein of Super Mario Bros. The game's levels are closed-off arenas, and the view usually allows you to see most of the level.. new update makes it really good. Not recommending this game solely because although it says "Tracked motion controllers", the game is 100% head-tracked, and it only uses the triggers primarily. Although the head tracking is pretty great, definitely not what I went in expecting.](#)

[All that being said, it is a very fun game! The head tracking is spot on, and does make sense for the setting. It also looks pretty great.](#)

[One minor issue I had was the intro cutscene gave me my first disorienting VR experience. When it went through the tiny spaceship compartments, that set off a bit of my claustrophobia as well, which was somewhat unsettling, but that doesn't last very long.](#)

[To the devs: I'd recommend reevaluating the current intro scene. Give us some frame of reference, a ship or suit at least..
